

Pip remoting

Using AI to solve daily problems

PIP controlling

- I daily use a 42” monitor for home pc use.
- I use a small pc as a TV tuner to watch tv on the monitor
- Usually I use PIP in order to watch tv while working

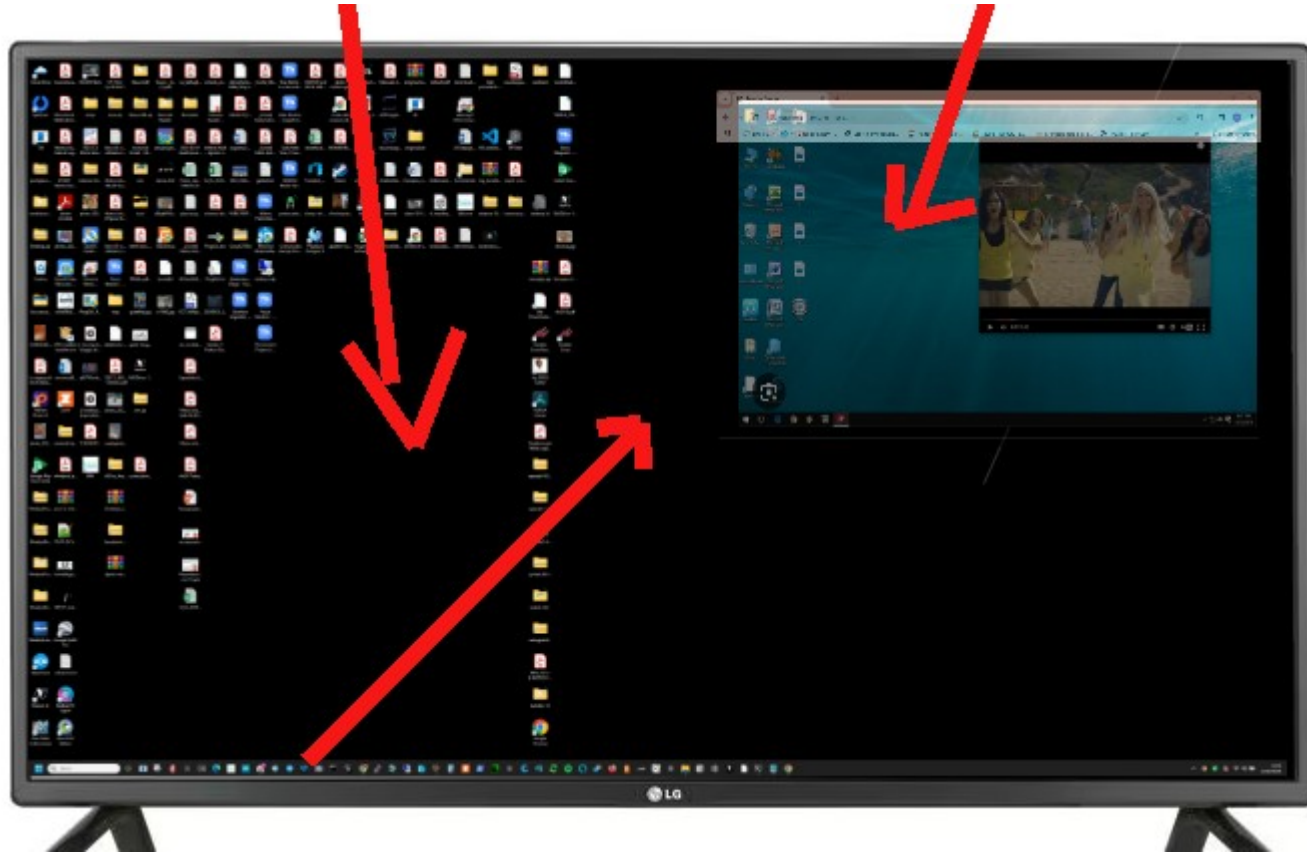

- Mini pc for TV view in PIP window
- Desktop pc for work use at full screen

- Chrome Windows will detect mouse events and send it to the mini pc.
- The minipc screen will be over the chrome windows.
- If I move the mouse pointer on the upper right part, I will be over the chrome window and so I will control the minipc

- Chrome Windows will detect mouse events and send it to the mini pc.
- The minipc screen will be over the chrome windows.
-

- If I move the mouse pointer on the upper right part, I will be over the chrome window and so I will control the minipc

Thank you!
